Revisiting Our Institution-Set Standards

Bri Hays

Campus-Based Researcher

Presented to the President's Cabinet

December 1, 2015

What are Institution-Set Standards?

- Institutionally-developed standards of performance
- Allows for comparison of actual performance to standards in a number of areas
  - Success rate
  - Retention (fall-to-fall persistence) rate
  - Students who received degrees
  - Students who received certificates
  - Students who received an award (certificate or degree)
  - Transfers
  - CTE program licensure exam pass rates
  - CTE program employment/job placement rates

Why Now?

- USDE requires accrediting commissions to evaluate of the appropriateness of student achievement measures selected by colleges

- ACCJC addressed this requirement in the 2013 annual report

- In 2013 we referred to our previously-established process of using 5-year averages as our "institution-set standards"

- We now have the opportunity to review our standards and revise as needed

- *Continuous quality improvement*

When Will We Report Any Changes?

- Annual report released around March each year

- Report out on our performance across a number of measures

- Identify our ISS for each measure

Standard-Setting Process

- PIE Committee reviewed and discussed historical data, trends, variability, and contextual information for each indicator

- 4 Institution-Set Standards recommended at 10/13/15 PIEC meeting

- 2 additional Institution-Set Standards recommended at 10/27/15 PIEC meeting

- Recommendations sent to President's Cabinet for review on 12/1/15

Objective for Today

- Review and discuss PIE Committee recommendations for each Institution-Set Standards (first reading)

Course Success Rate

10-Year Average = 68%

Next Steps

- Finalize Institution-Set Standards
- Submit new standards to ACCJC in spring 2016 annual report
